

## **403.02A, Crack Sealant**

### **Qualification Requests**

On the laboratory test report that is sent in with the request, the test data must show that the material is in compliance with the material requirements.

### **Qualification Samples**

The requirements for samples that are received for QPL prequalification are as follows.

- ◆ The Producer will submit a minimum of one Thirty (30) Pound (13.6 kg) sample for each type of Crack Sealant Material to be considered along with test results from an independent laboratory.
- ◆ MDT will test each sample according to the tests outlined in subsection "707.01 Concrete Joint Fillers ". The material will be rejected if the material does not meet the requirements.

### **Material Requirements**

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 707.01, the Supplemental specifications to Montana Standard Specifications subsection 707.01 or contract Special Provision.
